Professional Summary

Full Stack / Frontend Developer with 3+ years of experience building scalable web applications using React, TypeScript, and Node.js. Strong in frontend performance optimization, backend API integration, Shopify app development, and relational database design. Experienced in subscription platforms, map-based visualization systems, and cloud-native applications.

Technical Skills

Frontend: React.js, TypeScript, JavaScript (ES6+), Redux Toolkit, RTK Query, React Router, Tailwind CSS, Performance Optimization

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL

Shopify: Shopify App Development, Shopify SDK, Admin API, Storefront Setup, Polaris UI, OAuth

Cloud & Databases: AWS (Lambda, AppSync, Amplify), PostgreSQL, DynamoDB

Tools: Git, CI/CD, Jira, Agile/Scrum, Code Reviews

Work Experience

AptlyLabs (Infopark), Kochi

Dec 2022 – Present

Software Engineer – Full Stack

- Built scalable frontend applications using React and TypeScript with reusable component architecture.
- Optimized state management and API calls using Redux Toolkit and RTK Query.
- Developed backend APIs using Node.js and GraphQL with secure data handling.
- Designed responsive UI using Tailwind CSS and Shopify Polaris.
- Contributed to database design and query optimization using PostgreSQL.
- Participated in sprint planning, feature estimation, and peer code reviews.

Eco-friendly Social Media Platform

Overview

A subscription-based social media platform enabling users and organizations to share eco-focused content and promote products via Shopify.

Tech Stack

React, TypeScript, Node.js, GraphQL, PostgreSQL, AWS Lambda, Shopify SDK

- Implemented multi-language support using React i18n with dynamic content managed via PostgreSQL.
- Built a custom Shopify app using the React Router (Remix) template and Polaris UI for merchant onboarding.
- Integrated Shopify Admin APIs to sync products and enable merchants to boost store visibility.
- Designed custom database schemas to store Shopify metadata and platform-specific requirements.
- Integrated yearly subscription payments using Square payment gateway.
- Migrated 27,000 active users to organization-only accounts with zero downtime.

Traffic Monitoring and Map Visualization Platform

Overview

A real-time Google Maps-based platform for visualizing traffic density, camera locations, and clustered map markers.

Tech Stack

React, TypeScript, Redux Toolkit, RTK Query, Google Maps API, Node.js, PostgreSQL

- Integrated Google Maps for camera positioning, dynamic markers, and real-time pointing counts.
- Implemented marker clustering to efficiently handle high-density geospatial data.
- Optimized rendering performance using `useCallback` and `useMemo`.
- Reduced redundant API calls by caching responses using RTK Query global state.
- Contributed to backend database design with relational tables and optimized queries.
- Ensured sensitive data was never exposed to the client side.

Industrial Project (Self-Learning)

Aker BP Public Dataset – Cognite Data Fusion

- Built dashboards for asset metadata and time-series visualization.
- Integrated Cognite 3D Viewer and explored P&ID annotation workflows.

Education

B.Sc. in Electronics and Communication Science

University of Madras

2020

CGPA: 7.8

Certifications

- Hands-on with Industrial Data — Cognite Academy
- AWS Certified Developer – Associate (In Progress)

Additional Information

Languages: English, Malayalam, Hindi, Tamil
